

CONTACT DETAILS:

Phone: +33 772291695

Email: arij.fellah@uha.fr

LinkedIn: FELLAH Arij

Github: [arij2005](#)

Address: Mulhouse, Grand Est.

Valid Driver's License (Category B)

EDUCATION:

2024–2026 — ENSISA (École Nationale Supérieure d'Ingénieurs Sud-Alsace)

National Graduate School of Engineering, South Alsace

- Status: Public engineering school, affiliated with the University of Haute-Alsace (UHA)
- Program Duration: 3 years
- Current Year: 1st year
- Major: Computer Science and Networks

2022–2024 — Preparatory Classes for the Grandes Écoles (CPGE)

- Track: MPSI – MP (math&physics)
- Institution: Lycée Ibn Al-Ghazi, Rabat, Morocco

2021–2022 — International Baccalaureate (French Option)

- Track: Mathematical Sciences, Systems Engineering option
- Institution: Lycée Madariss Maria, Morocco

LANGUAGES:

- **French: Fluent**
- **English: Fluent**
- **German: Beginner**
- **Arabic: Native**

EXPERIENCE:

Dec 2025 – Algorithm & Programming Project (C)

- Modeled a transport network as a graph, implemented graph traversal algorithms (Dijkstra), dynamic data structures, and sorted stations by degree.
- Developed the command-line interface.

Dec 2025 – Mathematics & Signal Project (Python)

- Analyzed meteorological data (1950–2024), performed statistical and temporal signal analysis, and identified annual and multi-year cycles.

Sep 2025 – Immersion Project

- Collaborated in an 8-person team to design and develop a board game with fixed rules.
- Personally developed the AI logic for automated players' decision-making.

2024–2025 – TIPE – Preparatory Classes

- Modeled a two-body wave energy generator inspired by the PB3 PowerBuoy.
- Conducted dynamic and frequency analysis, optimized mechanical parameters to maximize wave energy recovery.
- I investigated the conditions that optimize energy recovery and performed simulations using Python within the Anaconda environment.

SKILLS:

- **Programming Languages:** C, Python, SQL, MATLAB
 - **Web Development:** HTML, CSS, JavaScript
 - **Algorithms & Data Structures:** Sorting, searching, graphs, trees, lists, queues, stacks, dynamic programming
- **Tools & IDEs:** Git/GitHub, Visual Studio, VS Code, Jupyter
 - **Operating Systems:** Linux, Windows
 - **Networking:** Ethernet, Internet
